

weinor PergoTex – the versatile weather resistant folding retractable roof system

The weinor PergoTex flexible folding roof converts a patio or terrace into a stunning outdoor living room with Mediterranean flair. When open, it lets you enjoy the full benefit of the sun, when closed, it provides light and UV protection. And as rain protection, it even resists a down-pour (from a pitch of 8° or higher). Tried and tested weinor retractable roof technology provides a maximum degree of wind resistance.

weiner PergoTex – the retractable fabric roof with a convertible feel

The elegant PergoTex protects against sun, wind and rain. It is transformed into a stunning outdoor living room when equipped with vertical awnings or all-glass elements. You can extend and retract the tear-resistant, light-resistant and water-resistant PVC awning fabric with ease – for maximum pleasure and comfort.

Versatile weather protection under your retractable roof

With its solid structural elements and the resilient, durable fabric, the weinor PergoTex offers outstanding wind stability – for even longer use and enjoyment.

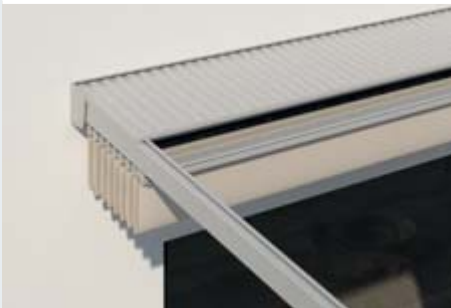

- especially tear-resistant, three-layer PVC fabric
- reliable sun protection with a closed roof
- optimal rain protection from a pitch of 8°

Sturdy roof construction – wind and rain resistant

The tear-resistant PVC of the PergoTex is fastened to robust aluminium transoms. This combination withstands wind strengths up to 8 (Beaufort) – even when the folding roof is extended.

- controlled drainage of rain-water with a minimum pitch of 8°
- the fabric is extended with lateral guidance – due to a robust counterbalance system

Safety shield bit – protection from moisture and dirt

The fabric and technology rest under a special protective safety shield when the folding roof is fully extended. Thus they are protected from moisture and dirt.

- reliable protection for the PVC fabric and transoms
- elegant covering of side channels and wall mounting

Practical and modular – for the ultimate protection and comfort

The weinor PergoTex is modular extendable. This means it can be equipped with additional components such as vertical shading elements, glazing elements, heating or LED lighting for the ultimate in luxury protection. These can also be retrofitted at a later date should you wish to increase the usage.

- glass side elements such as the all glass sliding door or fixed glazing
- vertical awnings such as VertiTex zip system
- LED lighting, heating, radio control and sensors

Over 150 weinor fabric patterns

Beautiful patterns, exquisite materials – for every application

The fabrics for Plaza Home and Plaza Pro

Breathtakingly beautiful and long-lasting: As weinor fabrics are saturated in colour, they retain their radiance for years to come. Teflon EXTREME® finishing makes them water and soil-repellant.

weinor true colours is our exquisitely colourful acrylic fabric collection. The fabrics are outstandingly durable and come in radiant colours – for beautiful patterns designed to last.

The hallmark of weinor magic colours is its vibrant patterns and high-stretch polyester which retracts to its original smooth state in warm conditions (weinor Memory-Effekt®).

The fabric for weinor PergoTex

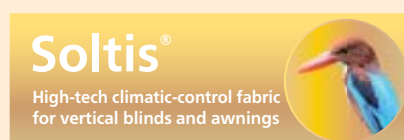

The Pergona PVC-coated fabric has an especially smooth, waterproof surface. Rain rolls off its surface in next to no time. Pergona is supple, sturdy and extremely tear-resistant.

The fabrics for side awnings

weinor Perluca, the fabric collection with breaks arranged at regular intervals, offers airy sun protection and privacy.

The Soltis® high-tech fabric was designed by Serge Ferrari® and its micro-pores make it especially air-permeable.

9 WiGa trend colours

An immense range of cutting-edge frame colours

Maximum colour safety: weinor has over 200 different frame colours for you to choose from. You can choose from diverse colours which harmonise with the architecture.

weinor provides a maximum degree of colour uniformity

As weinor does all the powder coating in its own workshop, you can also rest assured that different products come with the same top-class colour tonality and identical gloss level.

Choose from an abundance of high-quality colours:

- 47 standard RAL frame colours, silk gloss
- 9 scratchproof, resistant trend colours with an elegant textured look
- over 150 special RAL colours

weinor is an eco-friendly company. To ensure compliance with high environmental standards, manufacturing processes and materials undergo regular testing by experts.

As a result of the ban on the use of heavy metals in powder coatings, paint manufacturers can no longer guarantee colour stability despite making every effort to do so. It therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time. Colours may differ significantly due to the printing process.

BiConnect
Simply intuitive.

All-glass elements for PergoTex and Plaza Pro

You have the choice between a flexible all glass sliding door and fixed glazing for the extension of your retractable roof to provide extra comfort and protection from the elements. Both can be combined with weinor vertical awnings.

VertiTex – vertical sun protection for PergoTex and Plaza Pro

The VertiTex offers perfect visual and glare protection. If you still want to enjoy the view from your garden then look no further than our Perluca sheer acrylic fabric or Soltis® high-tech visually transparent fabric as your best options.

Paravento – easy to use sun and wind protection as well as privacy

Another way to enjoy greater privacy is to open out a side screen: the Paravento provides exceptional shelter from the wind and prying eyes, in a fabric and colour to match the awning if so desired.

Alternatively, you can control your Alfresco living products with io-homecontrol® by somfy.

LED/Design light bar – for extended use and enjoyment into the evening

Light bars can significantly extend the time you can use your terrace/patio.

- atmospheric light thanks to unique glass lenses
- highly energy efficient
- operating life of 30,000 hours
- continuous dimming with radio control

Tempura heating system – cosy warmth on cooler days

Pleasant, instant heat at the touch of a button – energy efficient Tempura infrared heating delivers a heat output of over 1,500 watts. Very easy to operate and also can be dimmed using the weinor radio control.

BiConnect radio control – intuitive operation

Control all your weinor products, whether it be a retractable roof, vertical sun protection, lighting or heating, with the pre-programmed BiEasy radio remote-controlled device. Choose the handheld transmitter to suit your needs, with or without display.
