| PRODUCT DESCRIPTION

Tarasola **Essential** is a graceful modern roofing system with a solid construction. This product meets the requirements of the most demanding users.

Essential is an aluminum bioclimatic pergola. The louvres open automatically and have a range of rotation from an angle of 0° through to 135°, which allows for sun exposure and air circulation control. The design is light and airy, moreover it can be fitted out with sliding glass, roller blinds and LED strip lighting. There are also various accessorizing options available including infrared heaters and wind, rain and temperature sensors.
